

Improving
Continuously
in Africa

We help fast growing businesses in Sub-Saharan Africa to structure and scale their Operations into operational excellence, so that they reduce process inefficiencies, improve productivity while gradually saving up to 20% in operations costs. Over the last 15 years, I've worked with multiple organizations in Africa to provide the necessary Supply Chain and Operational foundations and transform their teams to create massive gains in productivity.

VISION

To make Supply Chain and Operations in Africa more efficient and adapted for fast-growing organizations to expand efficiently and with agility to develop the continent's economy.

MISSION

To remove wastes from Operations and Supply Chain processes to develop the most efficient value creation while empowering people.

The background is a solid blue color. Overlaid on it is a complex graphic consisting of a grid of hexagons. A hand is shown from the right side, with fingers pointing towards the center, as if interacting with the hexagonal grid. Each hexagon contains a different icon related to business, technology, and operations. Icons include a dollar sign, a lightbulb, a Wi-Fi symbol, a gear, a person wearing a hard hat, a truck, a pie chart, a world map, a circuit board, a person silhouette, a service icon, a person on a motorcycle, and a person silhouette. The overall theme is professional and tech-oriented.

We are a boutique consulting firm, focusing on Operations and Supply Chain with a Lean thinking approach.

Who we are

Our aim is to provide small and medium customers and partners operating in Africa with a Lean culture, while working with them to design Supply Chain and Operations strategies and solutions in line with their global strategy and objectives.

We help clients enhance their customer focus and get the most out of their value chain by driving waste elimination and defect reduction through continuous improvement of their operations and supply chain.

We work with your team to create long lasting results and growth.

Our services

SUPPLY CHAIN CONSULTING & STRATEGY

We support your operations in developing the most adapted Supply Chain for your service, customers and company's objectives.

We bring expertise in different areas of the chain to optimise flux and cut wastes, developing agility.

LEAN - OPERATIONS IMPROVEMENT

We assess your operations, being logistics, manufacturing, warehousing, and work with your team to drive wastes out of the value chain and embrace better efficiency and costs cutting, bringing higher quality to your customers.

TRAININGS & WORKSHOPS Lean Operations

We offer various types of trainings to your teams, either standard ones or on demand.

We train on Lean tools and methodologies as well as Supply Chain good practices. It is ideally part of an improvement project but can also be stand alone.

Renewable Energy

The Consultant

Eric Ducroix is an Operations Executive with significant experience in Logistics Operations & Supply Chain management, having spent over 14 years working in complex and multicultural environments in Africa and the Middle East.

He holds an MBA from Warwick Business School in the UK and studied the uncertainties of corporation Supply Chain in Sub-Saharan Africa with Schneider Electric East Africa.

Six Sigma Green Belt and Lean certified, he has developed an interest and understanding of the Lean methodology through research and various projects. With Kaizen Consult, he is now supporting organizations with operations in Africa to improve their Supply chain and operations, using the Lean principles.

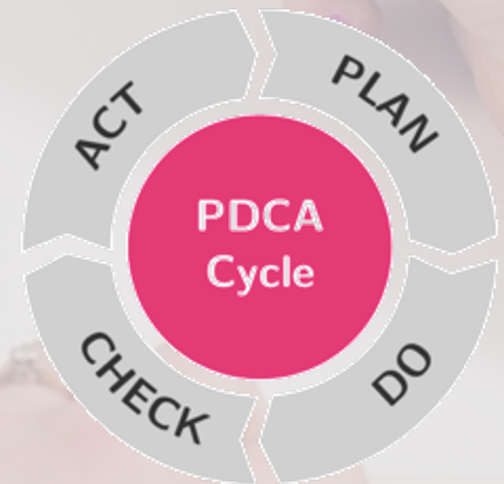

Consulting Methodology

Lean thinking approach

We use Lean thinking methodology and tools in our projects. We bring the continuous improvement and respect for people into the change we help customers to achieve, being in Supply Chain or Operations improvement.

We base our approach on the PDCA cycle (Or Deming Wheel). It is a reference used in Lean thinking for continuous improvement and providing the framework for constant iteration of improvement.

Deming wheel is also used in quality management and referenced in the ISO 9001 standard.
