

### END TO END SUPPLY CHAIN DIAGNOSTIC – IMPROVEMENT PROGRAM

[www.kaizen-consult.biz](http://www.kaizen-consult.biz)

We help organizations with Supply Chains in Africa to better control their flow of goods while creating agility in their operations to better adapt to the fast-changing environment.

Import Supply Chains in Africa can be complex, very dynamic and difficult to control. Quite often, problems like stockouts or long import lead times leading to missed sales; unreliable forecasting and difficult distributors relationships; or even improper use of inventory space can cost you a lot. Fixing all that and creating an agile Supply Chain, having the necessary flexibility to adapt while keeping the right level of control will help you increase your performance level and ultimately your bottom line.

#### *Understand to create agility*

We propose a full diagnostic of your end to end Supply Chain, or we can adapt to your needs and requirements. We look at the various elements of your Supply Chain and operations to identify quick wins and draw a program for improvement.

Financial gains can be massive and having the possibility to scale the operations is priceless.

*Ideal for all companies involved in Supply Chain in:*

- Energy sector
- Industrial products sector
- FMCG sector
- Pharmaceutical distribution sector

#### *What we propose*

- Review of the regional company strategy & objectives
- Review of the end to end Supply Chain, visibility and identification of pain points
  - Forecasting & demand
  - Import supply network & lead time
  - Use of inventory
  - Distributors relationships & distribution network
- Review of systems and their integration
- Identification of main areas of improvement & design of improvement program
