

### LOGISTICS PROJECT MANAGEMENT – FREIGHT FORWARDING

[www.kaizen-consult.biz](http://www.kaizen-consult.biz)

Developing a Supply Chain for a project in Africa as a one-off activity can be quite challenging. Indeed, lack of experience, complex and unclear import procedures and fast changing environment amplify the difficulties brought by the lack of infrastructure or the unclear clearance processes. We can help you manage your logistics project, anticipate the risks and the pitfalls, therefore avoiding large costs and delays on your projects.

#### ***Bringing in the experience***

Having handled logistics projects in several countries in Sub-Saharan Africa, we offer our experience and knowledge of the region to help you set up your operations and make sure nothing gets left behind.

Benefit from the experience of Kaizen Consult in logistics projects and freight forwarding to advise you and avoid large additional costs.

By planning your project well, getting the right advice and collecting the right information, you can guarantee the success of your project and remain within your budget and timeline.

*Ideal for all companies involved in projects:*

- *Energy sector*
- *Infrastructure sector*

#### *What we propose*

- Review of the project logistics and procurement planning with the team
- Planning the project Supply Chain based on milestones, defining necessary resources
- Risks analysis and risks management
- Review of full importation procedure and documentation for compliance
- Supply chain partners identification and setting up governance
- Coordination support and follow-up
